ABOUT THE EXPORT CREDIT AGENCY OF KAZAKHSTAN

National development institution aimed at Promotion of Non-Primary Exports.

Promotion of Kazakh non- primary goods and service providers through insurance and financial support measures at all stages of the export cycle

International representative offices in Russia, Kyrgyzstan, Tajikistan, Uzbekistan, and China

kazakhexport.kz

KazakhExport

Subsidiary of "National Management Holding "Baiterek" JSC

Insurance Financial Strength Rating of Baa1, at the level of Kazakhstan's sovereign credit rating

ESG Entity Rating of '3'

UN initiatives

Participant in the UN Global Compact, Member of UN Women WEPs (Women's Empowerment Principles) and participant in the Net-Zero Export Credit Agencies Alliance

Member of the Berne Union

Member of the Association of Major Export Credit Agencies of Islamic States and the Arab World

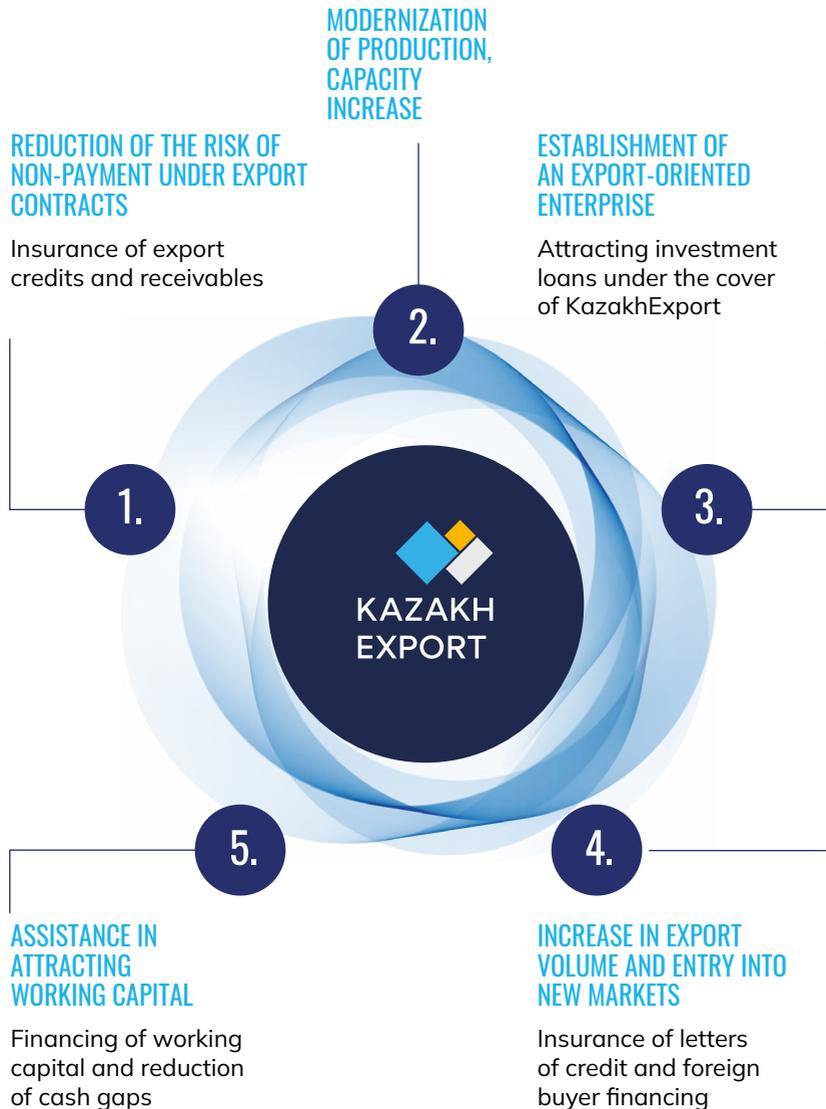

Participant in the Green Investment Principles as part of the Belt and Road Initiative

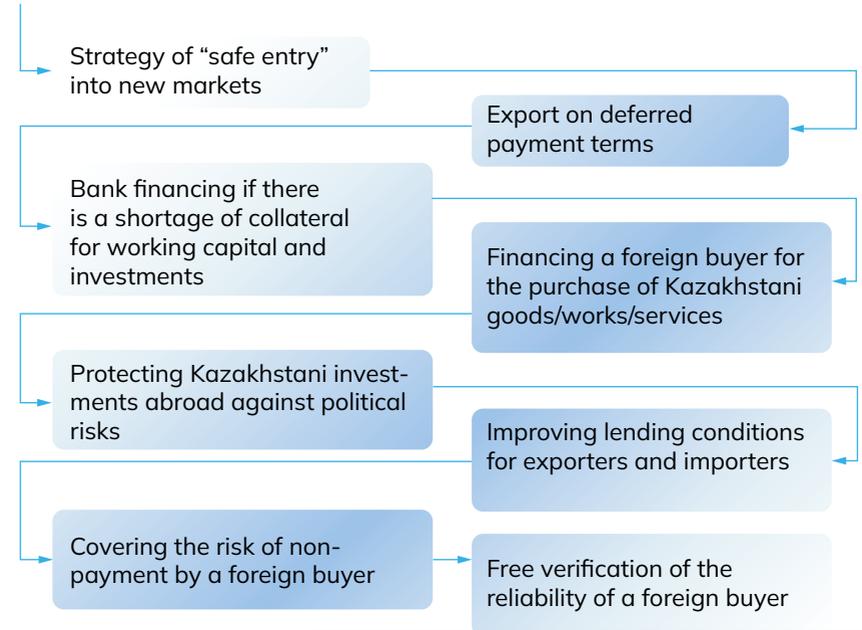

Member of ICISA – The International Credit Insurance & Surety Association (Netherlands).

SUPPORT AT ALL STAGES OF THE EXPORT CYCLE

OPPORTUNITIES AND BENEFITS OF COOPERATION

INSURANCE RISKS COVERED

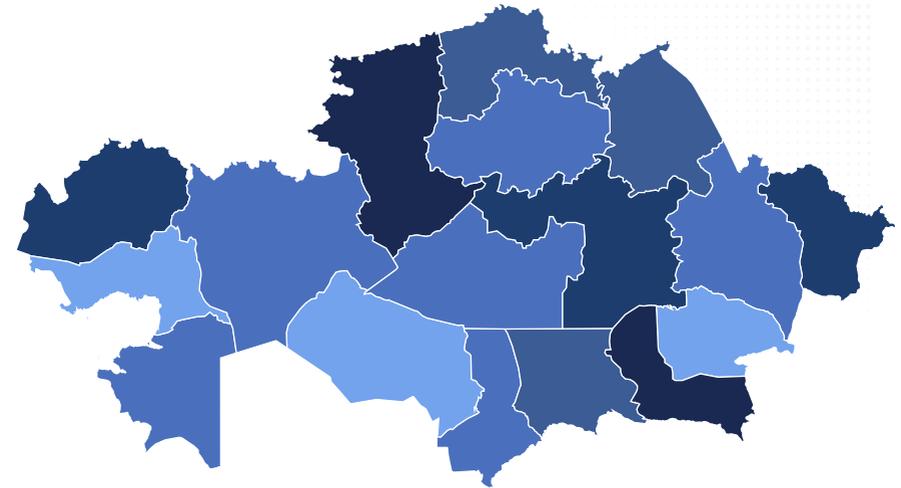

POLITICAL RISKS

- ◆ Restriction or prohibition on currency conversion or transfer of payments.
- ◆ Riots, civil unrest, war
- ◆ Cancellation or default of a contract by a foreign government authority
- ◆ Restriction or prohibition to deliver goods by a foreign country
- ◆ Insurance payment - up to 100% of the export credit amount

COMMERCIAL RISKS

- ◆ The buyer's failure to meet the contractual obligations
- ◆ The bankruptcy of the buyer, liquidation without legal successors
- ◆ The bankruptcy of a foreign bank
- ◆ Insurance payment - up to 100% of the export credit amount

METALLURGICAL INDUSTRY

KSP STEEL LLP

The plant produces steel seamless pipes of various diameters and for different purposes, used in the construction of pipelines, at the facilities of oil and gas production and exploration companies, and by machine-building and industrial enterprises.

In addition to supplies to the domestic market, the plant's products are actively exported to the CIS countries and other foreign countries, including the USA.

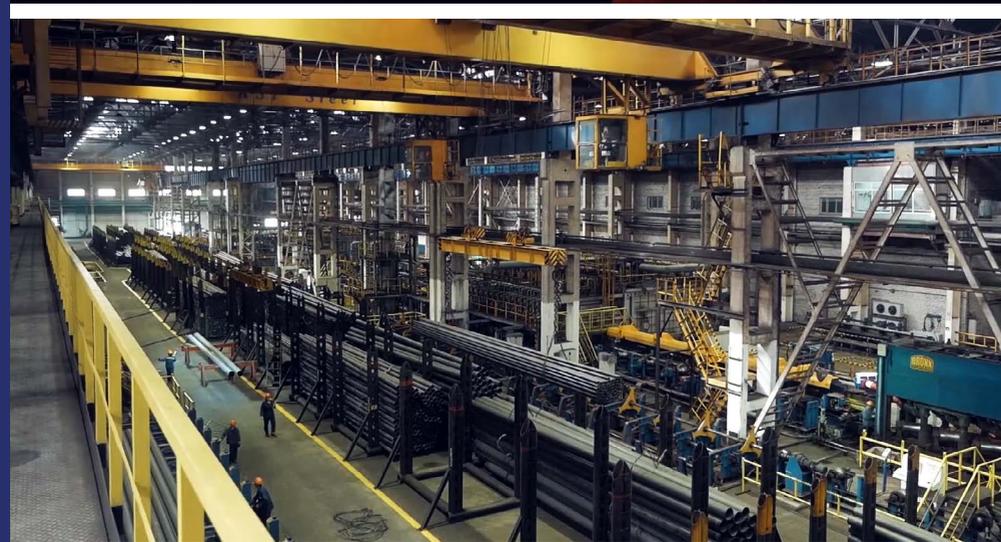

The favourable geographic location of the plant allows it to ship products quickly to any destination in Kazakhstan. Delivery of pipe products by sea via the port of Aktau helps KSP Steel to enter markets of the Caspian countries. The developed transport system allows the company to export domestic seamless pipes anywhere in the world.

METALLURGICAL INDUSTRY

ALUMINIUM OF KAZAKHSTAN LLP

The company is the leading enterprise specialising in the extrusion of aluminium profiles in the Republic of Kazakhstan.

The core business of the Company is the development, production, assembly and sale of construction aluminium systems. Corresponding to the international quality standards, the plant's systems properly compete not only in the market of Kazakhstan, but also abroad.

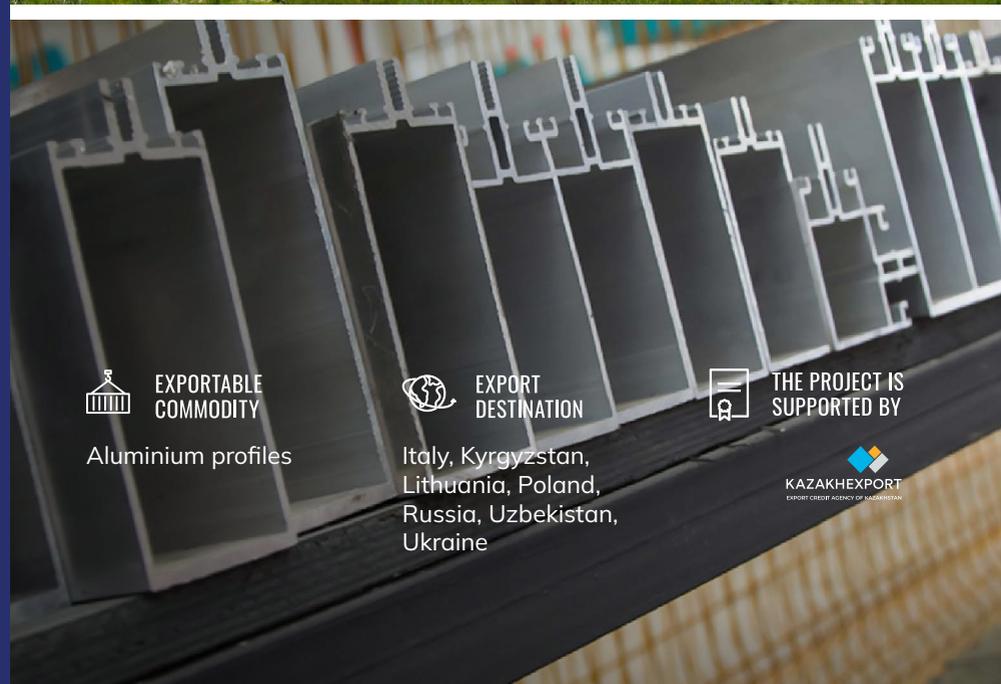

Since its foundation, the company has produced about 13,000 tonnes of products and created over 300 jobs. Since 2015, the company has switched to exporting manufactured products to neighbouring countries. Today, the plant has the capacity to produce 5,500 tonnes per year. Work is currently underway to modernise the plant to increase capacity and increase export sales by up to 80%.

METALLURGICAL INDUSTRY

EVRAZ CASPIAN STEEL LLP

A plant for the production of small-section rolled products. The design capacity of the plant is 450,000 tonnes of rolled rebar per year; Evraz West-Siberian Steel Plant JSC (EVRAZ ZSMK) supplies steel billets to the plant. Its product mix includes rebars of 10-40 mm in diameter and 6.0-12.0 metres in length. The plant sells its products in Kazakhstan and in other countries (Russia, Ukraine, Tajikistan, Kyrgyzstan, etc).

The plant has been built on a modern project and uses advanced technology. The general supplier of equipment for the plant is the Italian company Siemens SPA. During the implementation of the project, special attention was paid to environmental issues. For example, the impact of production on water bodies is completely eliminated.

METALLURGICAL INDUSTRY

BUSINESS-EXPO LLP

Business-Expo LLP supplies spare parts for rolling stock (wheel sets), and collects, stores and recycles scrap ferrous metals. The company has experience in exporting steel billets to Uzbekistan. Steel billets are used in the production of grinding balls, required for the mining industry and ore crushers.

The plant's products meet the high demands of the engineering industry. In addition, the rolling of low-alloy metals can be controlled so as to ensure optimum mechanical and technological properties in addition to improving the cast structure.

PRODUCTION OF MOTOR VEHICLES, TRAILERS AND SEMI-TRAILERS

HYUNDAI TRANS KAZAKHSTAN LLP

A Hyundai car manufacturing facility in Kazakhstan kicked off its operations in April 2019, as construction commenced in the industrial hub of Almaty, with an allocated 25 hectares of land complete with all essential infrastructure.

Hyundai Trans Kazakhstan LLP is fitted with the latest equipment produced in South Korea, including the shops of welding, painting, assembly, painting of plastic parts and a warehouse for components.

Hyundai's high standards of quality at the enterprise are ensured by the experienced mechanical engineering specialists under the supervision of the engineers of Hyundai Motor Company.

The model range is represented by vehicles with a lifting capacity from 1.5 to 5 tonnes based on the Hyundai HD 35L, HD 65, HD 78 chassis - these are trucks such as flatbed trucks, insulated vans, industrial vans, refrigerators.

Also available:

- Small, medium, and large capacity dump trucks.
- City and intercity buses.
- Trucks designed for food and beverage transportation (refrigerators, dry cargo, etc.)
- Specialized equipment such as garbage trucks, container trucks, fuel trucks, concrete mixers, vacuum water trucks for transportation of technical and wastewater.

ARASAN FIRM LLP

Arasan was founded in 2000 on the site of merchant Lorenz's old brewery in Kostanay, which began operations in 1897. In 2005, a new modern brewery was built in Rudny, with production equipment supplied by Ziemann. Three production sites (in Kostanay city and two in Rudny city) are united in "Erzmann Brewery" holding. Today the company occupies leading positions in the beer market of Kazakhstan.

Arasan continues the traditions of classical brewing. The beer is made from the best European raw materials - hops and malt. In addition, the company supplies a wide range of beverages to the Russian market: mineral water in PET bottles, non-alcoholic sparkling drinks and Kvas.

FOOD PRODUCTION

RAIMBEK-AGRO LLP

The history of the Raimbek Group began in 1992, with the establishment of a modest commercial firm, Raimbek, that wholesaled and retailed electronics from Singapore, Japan, Italy, Switzerland, and Hong Kong.

Raimbek Bottlers introduced the Juicy juice line in three flavors - orange, apple, and tomato. From the very beginning, the company relied on direct cooperation with global

concentrated juice producers. This approach ensured thorough quality control at every production stage, enabling fair pricing for consumers without intermediary commissions.

Subsequently, Raimbek Alco emerged, focusing on the exclusive supply of premium alcoholic beverages to Kazakhstan. The company's partnership portfolio includes

contracts with famous global producers such as Bacardi-Martini, Brown Forman, Tommasi, Castello Banfi, Les Grands Chais de France, Concha y Toro, and others. As an active member of the AlcolImport Association of bona fide importers of alcoholic beverages of the Republic of Kazakhstan, Raimbek Alco underscores its commitment to maintaining trust among consumers in Kazakhstan, reflecting its esteemed status and responsible business ethos.

A new venture, Raimbek Agro, was launched to produce dairy products, specifically ultra-pasteurized natural milk. In accordance with stringent hygiene protocols, the milk undergoes temperature treatment and is packaged under sterile conditions. These measures ensure shelf stability for up to 9 months under normal storage conditions. Raimbek Agro is represented by three brands: "Ainalaiyn", "Miloko", and "Baby Bomba".

In 2003, Raimbek Group expanded into the international arena, establishing Raimbek Food (XINJIANG) Co. Ltd in China to meet the needs of the Chinese juice market. Notably, it was the first Kazakhstani enterprise with 100% private capital in China. A few years ago, the plant was sold to Chinese entrepreneurs.

Today, Raimbek Group is a large diversified holding. Its member enterprises make a significant contribution to the economy of Kazakhstan. Their high-quality products have won trust and recognition, not only within Kazakhstan but also throughout Central Asia, Russia, and the Caucasus.

PRODUCTION OF OTHER NON-METALLIC MINERAL PRODUCTS

IZOTERM MANUFACTURING AND TRADING COMPANY LLP

IZOTERM is the first factory in Kazakhstan that produces modern thermal insulation materials based on basalt fiber using the European equipment of the Slovenian “EUROVEC” concern. The company has two factories for production of mineral insulators. In 2007, the factory in Ust-Kamenogorsk, Glubokoye village, was put into operation. In 2017, due to the high demand for the products, the company expanded and launched a second factory located in Temirtau, with the latest equipment, which allows to produce the highest quality products at minimum production costs. Experience gained over the years allows the factory to produce heat insulation materials with an optimal price-quality ratio. Mats and plates have high indicators for environmental friendliness, thermal conductivity and incombustibility, corresponding to modern requirements for thermal insulation materials.

The spinning mill operated by AZALA Cotton LLP stands as the primary facility in the republic for producing high-quality single-stranded and twisted cotton yarn. Utilizing the ring spinning method, yarn is manufactured through two spinning systems - combed and carded - tailored for weaving and knitting production.

Established in 2017, the AZALA Cotton factory boasts a production capacity exceeding 5 thousand tonnes of finished cotton products annually, with an impressive 80% utilization rate in 2023.

In 2020, construction commenced on a second factory dedicated to synthetic yarn production, culminating in its completion in 2022. This facility has a production capacity of 2.4 thousand tonnes per year, with a projected utilization rate of 60%, focusing on blended yarn.

Currently, the enterprise spans over 20 thousand square meters in total area. Its technological equipment comprises machinery from Swiss, German, and Japanese manufacturers meeting the international technological standards requirements.

MANUFACTURE OF TEXTILE PRODUCTS

BALABI TEXTIL LLP

Balabi Textile LLP was established in 2022, and the factory was launched in 2024. It is a high-tech production facility for hosiery products, providing 260 jobs. PRODUCTION OF ELECTRICAL EQUIPMENT

KAINAR-AKB LLP

Kainar-AKB LLP is an enterprise that has a developed economy and a full technological cycle of rechargeable batteries production. All battery components are manufactured at the factory - from casting the components to assembling the finished products. The factory also recycles used batteries, turning them into primary raw materials. As a result, the cost of manufacturing batteries is reduced to a minimum and the prices are minimal. This is one of the many advantages that distinguish the products of the factory in comparison with similar products of other companies.
