## SINCE 2016:

More than **KZT 845 billion 1,8 billion USD** in commitments

Supported **over 200** Kazakhstan exporters and **over 1700** foreign importers

Raised funds from second-tier banks: **KZT 506,2 billion 1,1 billion USD**

Paid out on insurance claims: **KZT 14,6 billion 31,1 million USD**

## SUPPORT AT ALL STAGES OF THE EXPORT CYCLE

## OPPORTUNITIES AND BENEFITS OF COOPERATION

- 1 Strategy of safe access to new markets
- 2 Export on deferred payment terms
- 3 Bank financing if there is a shortage of collateral for working capital and investments
- 4 Financing a foreign buyer to purchase Kazakhstan goods/works/services
- 5 Protecting Kazakh investments abroad against political risks
- 6 Improving exporter and importer credit conditions
- 7 Assuming the risk of non-payment by a foreign buyer
- 8 Free verification of the reliability of a foreign buyer

## COVERED INSURANCE RISKS

### Political risks

- ◆ Restriction or ban on a currency conversion, transfer of payments
- ◆ Riots, civil unrest, war
- ◆ Cancellation or default of a contract by a foreign government authority
- ◆ Restriction or prohibition to deliver goods by a foreign country
- ◆ Insurance payment of up to 100% of the export credit amount

### Commercial risks

- ◆ The buyer's failure to meet the contractual obligations
- ◆ The bankruptcy of the buyer, liquidation without legal successors
- ◆ The bankruptcy of a foreign bank
- ◆ Insurance payment up to 100% of export credit amount

## EKIBASTUZFERROALLOYS LLP

### About company

Construction of a modern ferrosilicon plant with a production capacity of 240,000 tonnes of products per year.

The project aims to meet local and global demand for ferrosilicon by production and further sales in the markets of Kazakhstan, Europe, South-East Asia, and North and South America.

The project is scheduled to be implemented in December 2023.

### Exportable commodity

Ferrosilicon

### Export destination

Russia, Switzerland

### The project is supported by

## KSP STEEL LLP

### About company

The plant produces steel seamless pipes of various diameters and for different purposes, used in the construction of pipelines, at the facilities of oil and gas production and exploration companies, and by machine-building and industrial enterprises. In addition to supplies to the domestic market, the plant's products are actively exported to the CIS countries and other foreign countries, including the USA.

The favourable geographic location of the plant allows it to ship products quickly to any destination in Kazakhstan. Delivery of pipe products by sea via the port of Aktau helps KSP Steel to enter markets of the Caspian countries. The developed transport system allows the company to export domestic seamless pipes anywhere in the world.

### Exportable commodity

Seamless steel pipes, fittings

### Export destination

Russia

## ALUMINIUM OF KAZAKHSTAN LLP

### About company

Hoffmann Aluminium is the leading enterprise specialising in the extrusion of aluminium profiles in the Republic of Kazakhstan.

The core business of the Company is the development, production, assembly and sale of construction aluminum systems. Corresponding to the international quality standards, the plant's systems properly compete not only in the market of Kazakhstan, but also abroad.

Since its foundation, the company has produced about 13,000 tonnes of products and created over 300 jobs. Since 2015, the company has switched to exporting manufactured products to neighbouring countries. Today, the plant has the capacity to produce 5,500 tonnes per year. Work is currently underway to modernise the plant to increase capacity and increase export sales by up to 80%.

### Exportable commodity

Aluminium profiles

### Export destination

Italy, Kyrgyzstan, Lithuania, Poland, Russia, Uzbekistan, Ukraine

## EVRAZ CASPIAN STEEL LLP

### About company

A plant for the production of small-section rolled products. The design capacity of the plant is 450,000 tonnes of rolled rebar per year; Evraz West-Siberian Steel Plant JSC (EVRAZ ZSMK) supplies steel billets to the plant. Its product mix includes rebars of 10-40 mm in diameter and 6.0-12.0 metres in length. The plant sells its products in Kazakhstan and in other countries (Russia, Ukraine, Tajikistan, Kyrgyzstan, etc).

The plant has been built on a modern project and uses advanced technology. The general supplier of equipment for the plant is the Italian company Siemens SPA. During the implementation of the project, special attention was paid to environmental issues. For example, the impact of production on water bodies is completely eliminated.

### Exportable commodity

## AKTOBE RAIL AND SECTION WORKS LLP

### About company

A unique enterprise in Kazakhstan for the production of high quality differentially heat-strengthened rails and medium shaped rolled products.

The design capacity of the plant is 430,000 tonnes, including 200,000 tonnes of rails and 230,000 tonnes of rolled sections. The production volume meets the domestic demand and allows export supplies. The Aktobe Rail and Section Works LLP is the third in the world (Austria, China) and the only plant among Eurasian Economic Union countries to produce new generation rails with increased durability up to 120 metres long.

### Exportable commodity

Rails

## TARAZ METALLURGICAL FACTORY LLP

### About company

Integrated producer of ferroalloys, electrode mass and phosphate products. Taraz Metallurgical Plant LLP is a part of SAT & Company JSC, a vertically integrated mining and metallurgical holding company.

### Exportable commodity

Ferro alloys

### Export destination

Azerbaijan, Georgia,  
Russia, Tajikistan,  
Uzbekistan

## KAZARMAPROM LLP

### About company

The company was established in 2003 on the basis of the oldest machine-building enterprise "Uralskiy Armaturniy Zavod". Since 1995, the company has been manufacturing and exporting cast-iron grinding balls.

The annual export volume exceeds 16 000 tonnes and there is an opportunity to increase the export volume to 24 000 tonnes. The products are certified by the CT-KZ. At the moment, the company is modernising its iron foundry with the installation of modern equipment and expanding the range of products manufactured.

## BUSINESS-EXPO LLP

### About company

Business-Expo LLP supplies spare parts for rolling stock (wheel sets), and collects, stores and recycles scrap ferrous metals. The company has experience in exporting steel billets to Uzbekistan. Steel billets are used in the production of grinding balls, required for the mining industry and ore crushers.

The plant's products meet the high demands of the engineering industry. In addition, the rolling of low-alloy metals can be controlled so as to ensure optimum mechanical and technological properties in addition to improving the cast structure.

### Exportable commodity

Steel billets

### Export destination

Uzbekistan

## KAZARMATURA LLP

### About company

The company was founded in 2012 as part of the State Programme for Industrial and Innovative Development of the Republic of Kazakhstan.

The territory of the plant is more than 4,000 square meters of production facilities. When establishing Zavod KazArmatura LLP, time-tested technological developments as well as the latest innovative imported equipment (Japan, Germany, Korea) were used.

The main activities of the plant are the production of pipeline valves for the energy and oil and gas sectors, equipment for oil and gas production, as well as their further transportation.

## FIDELIS GLOBAL LLP

### About company

The company's core business is the production of plastic and aluminium profiles, windows, pipes and fittings.

The company is a part of the Galaksi Group. In 1996, the company imported all products from other countries: Turkey, Germany, and China. Later it was decided to produce all materials locally, directing investments to the development of production in Kazakhstan with world standards of production quality.

### Exportable commodity

Plastic tubes

### Export destination

Germany, Russia,  
Finland, Sweden

## AZIAMETCOM LLP

### About company

The core business is non-ferrous metal casting. There are three furnaces for the production of aluminium ingots in the company's industrial base.

The ingots are semi-finished products for the production of various aluminium products: building structures, furniture frames, plumbing fixtures (taps) and others.

### Exportable commodity

## IZOTERM MANUFACTURING AND TRADING COMPANY LLP

### About company

IZOTERM is the first factory in Kazakhstan that produces modern thermal insulation materials based on basalt fiber using the European equipment of the Slovenian "EUROVEC" concern. The company has two factories for production of mineral insulators. In 2007, the factory in Ust-Kamenogorsk, Glubokoye village, was put into operation. In 2017, due to the high demand for the products, the company expanded and launched a second factory located in Temirtau, with the latest equipment, which allows to produce the highest quality products at minimum production costs. Experience gained over the years allows the factory to produce heat insulation materials with an optimal price-quality ratio. Mats and plates have high indicators for environmental friendliness, thermal conductivity and incombustibility, corresponding to modern requirements for thermal insulation materials.

### Exportable commodity

Mineral boards

### Export destination

Kyrgyzstan, Russia,  
Tajikistan, Uzbekistan

## KAZOGNEUPOR-2015 LLP

### About company

The factory was founded in 1976, today it is the flagship of Kazakhstan refractory industry.

The largest in Central Asia and one of the largest in the CIS manufacturers of aluminosilicate refractories based on its own electrocorundum and chamotte.
